

Lasting color and timeless curb appeal

Leave the painting to us

Captivate® Prefinishing eliminates the labor-intensive task of painting your siding and trim. It comes pre-painted in the color you choose, direct from our finishing partners. Captivate uses paints with special solar reflective pigments for darker color options that won't overheat the board. Paint is applied with high-tech machines that ensure consistent coverage and a smooth coat. The finish on each piece is cured in a controlled environment instead of hoping for the right weather conditions on site. It's about as perfect as a paint job can be.

CAPTIVATE®
PREFINISHED SIDING & TRIM

AZEK 5" Straight Edge Shingle Siding in Whisper Gray

AZEK Trim in Cumulus White

LIFETIME LIMITED PRODUCT WARRANTIES

Captivate® substrates carry the AZEK Lifetime Limited Warranty against the siding and trim experiencing rotting, splintering, swelling, and warping from excessive moisture absorption.

15-YEAR PAINT PERFORMANCE WARRANTY

The paint manufacturer warrants Captivate paint performance against cracking, peeling, or flaking for 15 years.

Captivate® Prefinishing: enhanced with PaintPro® Technology

Captivate® Prefinishing is built on a cellular PVC substrate for longevity and rot resistance, with PaintPro® Technology for superior paint adhesion. The Captivate process uses the best paint, application methods, and indoor curing to deliver finish consistency and high performance.

PVC SUBSTRATE

Wood's worst enemy is moisture. It leads to rot and warping, so wood needs frequent painting for protection. Lightweight, easy-to-work-with PVC is impervious to water, fire-resistant, and always consistent — no knots, cupping, or irregularities — plus it carries a Lifetime Limited Warranty.

PAINTPRO® TECHNOLOGY

This proprietary factory treatment, exclusively from AZEK, is like priming, but much more. Captivate® starts with AZEK products enhanced with PaintPro® Technology that help paints adhere stronger and last longer than on ordinary, untreated PVC.

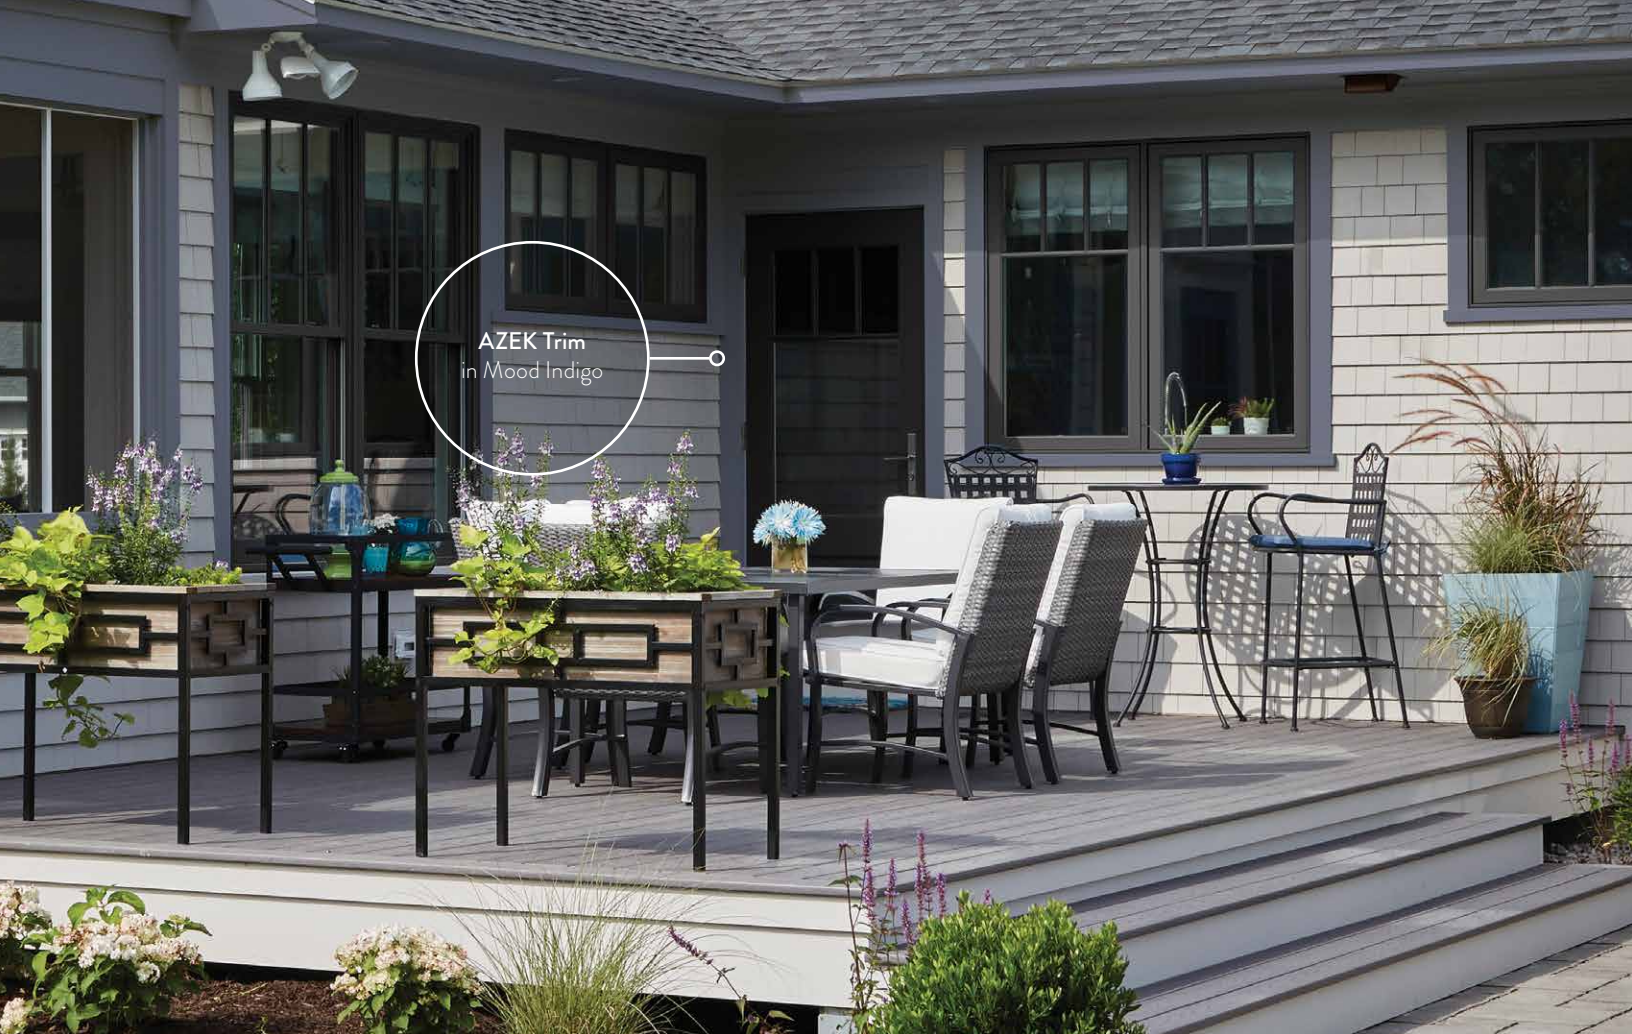

CAPTIVATE® PREFINISHING

Our prefinishers use DuraColor™ paints from PPG, warranted for 15 years. Specially formulated for PVC using solar-reflective pigments, it's applied at the precise thickness for durability and performance. Indoor curing enhances consistency and keeps your project on schedule.

CAPTIVATE® PREFINISHING

Color choices that last

Captivate lets you choose siding and trim colors to achieve the look you want. With Captivate Prefinishing, classic white trim, complementary-colored trim, or bold, modern monochromatic siding and trim are all possible. PVC's water resistance means the paint won't peel, flake, or chalk like on wood, so the finish is long-lasting.

Inspired by the beauty of nature

Colors from the Captivate palette, informed by wind, water, and woodland, are a natural fit for any home.

CUMULUS WHITE	ACADIAN COASTLINE	SUEDE TAUPE	WARM STONE	STORM CLOUD	WARM COFFEE
NAPATREE DUNES	CLAMBAKE	WHISPER GRAY	GRAPHITE GRAY	GREAT LAKE	MOOD INDIGO
DARK SAGE	VERMONT SPRUCE	DARK SHALE	NAUTICAL MIST	BARN DOOR RED	MIDNIGHT BLACK

Colors are represented but limited by printing technology — request an actual color sample from your local AZEK rep.

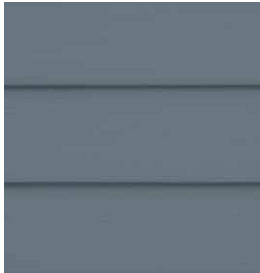

Premium appearance, superior performance

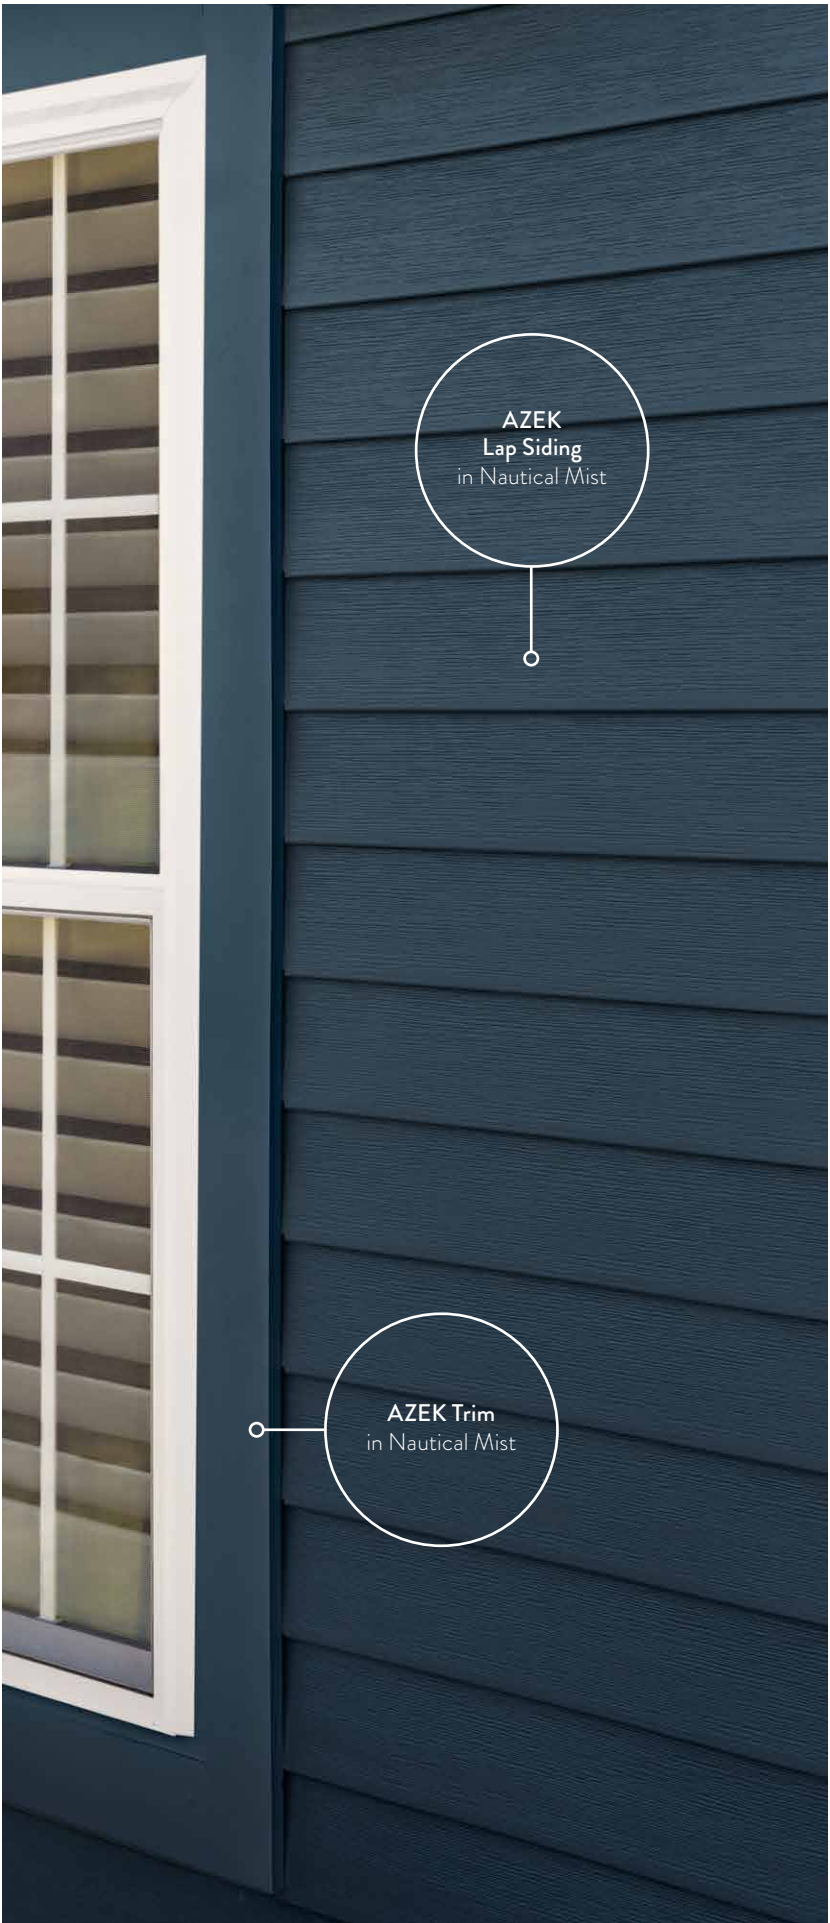

Introducing AZEK Lap Siding, the latest innovation from AZEK Exteriors. Get the time-honored aesthetic of wood lap siding, but with none of wood's maintenance and rot headaches. It's solid and sturdy, unlike hollow-backed vinyl siding. The innovative nail hem system means butt joints are tight and nearly invisible, while long boards mean fewer joints and longer uninterrupted runs. Floating installation uses a drop-and-lock profile that interlocks one row into another. Available in 4 ½" and 7 ½" reveals and either a Captivate® paint finish or a durable, bonded color cap in six color choices.

Lap Siding in Great Lake

Match AZEK Lap Siding with Captivate Trim

AZEK Lap Siding and Trim are engineered to work together for a seamless look and streamlined install. Now, with Captivate Prefinishing, the color coordinating is just as perfect. Captivate Trim will match or complement any of the original six capped Lap Siding colors, or get your Lap Siding and Trim finished in any Captivate color. If you can envision it, Captivate Lap Siding and Trim delivers it.

Texture and visual interest across architectural styles

AZEK Shingle Siding that is prefinished with Captivate® recreates the natural look of traditional cedar shingle siding while eliminating the ongoing maintenance required. Straight edge 5" reveal, 7" reveal, and staggered edge 6" reveal offer dramatically different looks to consider. Captivate Prefinishing saves valuable time at the jobsite, as does the smart design of the siding itself.

With no two shingle tabs the same width on every panel, the installed appearance of the shingle mimics the craftsman appearance of installed cedar siding.

Straight Edge Shingle in Suede Taupe, 7" reveal

Staggered Edge Shingle in Storm Cloud, 6" reveal

Unique flexible batten size and spacing

Our board & batten siding opens up many design possibilities. AZEK Sheet and Trim makes batten size and spacing flexible, not limited to a specific dimension. With Captivate® Prefinishing, boards and battens can use identical, complementary, or contrasting colors.

TRADITIONAL NARROW SPACING

Traditionally based on 8" board widths, board and batten spacing was narrow. Spacing between 8" and 12" fits smaller, compact exteriors well.

CONTEMPORARY WIDE SPACING

Reflecting modern farmhouse popularity, 12" to 16" batten spacing adds clean lines and reduces visual clutter on large siding spans.

AZEK® SHEET TRIM & SHEET

Trim, siding, and sheet for any build

The broad range of Captivate® Siding and Trim options let you create a customized, harmonious look for your exterior project. Trim can even be bent to fit curves. Choose between a smooth finish or a more rustic woodgrain texture to match your style.

Is Captivate Sheet trim or is it siding? It's actually both. Sheet with Captivate Prefinishing uses panels of PaintPro® enhanced AZEK material in 4' widths, with 1/2" and 3/4" thicknesses and 8', 10', and 12' lengths. As siding, it can be left dramatically smooth or trimmed up with battens or other pieces. As trim, it can be cut into uniquely shaped pieces, though some paint touch-up on the cuts will be necessary. Reversible to smooth or woodgrain, versatile AZEK Sheet is a siding and trim blank slate, open to the vision and talents of your team.

Captivate uses the best material

All Captivate products begin with the wide variety of AZEK Exteriors profiles. Using PVC eliminates the rot, swelling, and frequent repainting of wood. Instead, you get trim and siding with unmatched beauty and moisture resistance that lasts year after year.

Insect Resistant

Weather Resistant

Lightweight

Fire Resistant

Avoid maintenance headaches with AZEK Captivate

COMPOSITE WOOD

Moisture affects composite wood similarly to natural wood. The resins and other chemicals added to the wood fibers offer some protection, but water will cause swelling, movement, and potentially paint failure.

PAINTED CEDAR

Cedar, being a natural material, is prone to retaining moisture. Over time, moisture can become trapped behind the siding, leading to mold and mildew, or causing the siding to rot. Wood-boring insects like termites and carpenter ants also can cause costly damage.

HIDDEN DAMAGE

Water finds its way into many exterior walls. Absorptive materials such as wood hold that moisture, swelling, shrinking, and affecting more of the wall system. Unnoticed rotting can spread to other building materials, leading to damage behind the exterior shell.

Building for tomorrow, responsibly

Our mission goes beyond outdoor living — it's about shaping a sustainable future. By advancing recycling, protecting forests, and lowering carbon emissions, we're making a positive impact today, so generations to come can enjoy the spaces we create together.

HERE'S HOW WE'RE MAKING AN IMPACT:

-  Creating long-lasting materials made with high recycle content
-  Protecting natural resources
-  Advancing circularity through recycling and manufacturing processes

WE'RE THE #1 VERTICALLY INTEGRATED PVC RECYCLER IN THE US

The FULL-CIRCLE Recycling® program is at the heart of our approach. Recycling bins are capturing scrap and waste materials at lumberyards, OEMs, and even at construction sites. When a house is resided, almost a ton of old vinyl siding may be removed, reprocessed, and transformed. The FULL-CIRCLE program will take all of that scrap — from anyone anywhere — and remove it from the jobsite, free of charge.

GET INVOLVED FOR ZERO COST

- Find recycle bins near you
- Get set up with a dealer bin
- Inquire about jobsite bins

OUR GOAL IS TO USE 1 BILLION POUNDS OF RECYCLED MATERIAL ANNUALLY

Each year, we take hundreds of millions of pounds of what could otherwise be landfill- and ocean-bound wood and plastic waste, scrap and trash, like grocery bags, milk jugs, old vinyl siding, PVC pipe, and construction waste and turn it into AZEK Exteriors and TimberTech products.

DIVERTING

2.6B LBS

of waste and scrap
incorporated into our
products since 2019

SAVING

4M+ TREES*

preserved since 2001
by homeowners
choosing us over wood

INDUSTRY LEADER IN ADVANCED MATERIALS

We're proud of the recognition we've earned for our innovative, durable, and sustainable building products.

*Represents the equivalent number of trees preserved.

Meet our Captivate® Prefinishing partners

Captivate regional finishing partners work closely with AZEK Exteriors engineers and have been through rigorous training on the unique requirements for painting PVC featuring PaintPro® Technology.

Only the top solar-resistant paints and pigments are used, ensuring long life and an excellent finish. Our partners have invested in the equipment, processes, and people to do a job that's up to our standards — and yours.

Captivate Prefinishing started in the east, grew toward the Midwest, and now is moving to a true nationwide footprint. Your region's Captivate prefinisher is:
