

# Noble and natural

If you're looking for a softwood that can transform your interior as well as it can handle the outdoors, Thermory Benchmark Clear Pine is the perfect choice. Our thermally modified radiata species can enhance any space with a golden-brown tone and knot-free profile that shows off its natural grain.

**SPECIES:**

Radiata pine

**APPLICATIONS:**

Cladding

Thermally modified

Sustainable

Weather resistant

Lightweight material

Smooth cutting

Rot resistant

## Cladding

The natural, knot-free way to make your walls come alive

|                            |                       |
|----------------------------|-----------------------|
| <b>WIDTHS:</b>             | 2.5" - 5.5"           |
| <b>THICKNESS:</b>          | 0.79"                 |
| <b>INSTALLATION TYPES:</b> | VISIBLE, HIDDEN, PACS |

### Thermally modified

Thermal modification is a chemical-free process that gives you the beauty of real wood, naturally enhanced with only heat and steam for unequaled strength and stability—even in changing weather conditions.

### Sustainably sourced

We source all our wood using responsible forestry practices, never laying a finger on our tropical woodlands and rainforests. And, wood is the only naturally renewable building material that doesn't generate hazardous waste. So, when you choose Thermory, you're not just investing in quality—but in the health of our planet, too.

### Color transformation

Wood's natural aging process is influenced by how much exposure it has to the elements. The more Benchmark Clear Pine is exposed to UV light and rain, the faster its color will transform from brown to silver—sometimes in as little as six months. To maintain your wood's natural color outdoors, simply treat the boards with a penetrating UV protective oil.
