- Deckorators Cable Railing
- InvisiRail Glass Rail Systems

## HARDWOOD PLYWOOD

- Birch

## FACTORY FINISHING

Get customization with unmatched consistency! Whether it is a primer over siding, a coat of oil for a decking project or a custom topcoat over pine, cedar or exotic wood, we do it all — for less than the cost of field coating and with more uniformity.

## DECKORATORS

Deckorators' Surestone technology is a leap forward in performance: it's lighter, stronger, has better traction and doesn't expand and contract. Combined with the exciting fighter board in Venture and a world-class aluminum and cable rail offering, Deckorators is a complete brand you can count on with support you may not be accustomed to.

## UFP-EDGE

UFP-Edge Thermally Modified Wood Collection cladding is made to last. Not only does it have a great curb appeal, but it's also more durable than typical wood siding because it resists rot. Offering both prefinished Ponderosa Pine and VG Hemlock, UFP-Edge allows us to say yes to any exterior aesthetic.

## AZEK CAPTIVATE

Finally, the timeless look of painted wood siding and trim with none of the maintenance. AZEK Captivate presents prefinished PVC shingles, bevel siding, board and batten siding and trim boards using coatings that create a molecular bond to AZEK Paint Pro products. With a bold palette of quick-ship colors and custom colors readily available, AZEK Captivate is for when forever matters.

## EVOLUTION

Simply put, it's the prettiest primed board on the market. Our three-coat process and careful milling ensure an ultra-smooth board with great hide and zero defects.

## EXOTIC HARDWOODS

Russin does exotic hardwoods differently! We have better control over the supply chain, tight grading rules and great availability for our partners. In a challenging category, you can count on Russin.

## CUSTOM MILLING

Our custom milling operation is here to make specific needs a reality. Get a call for a pattern you don't carry? Need to match a historical project? Just have a customer who wants something unique to them? Our mill shop can do it all and for less than you'd think.

## THERMORY

In 1997, Thermory pioneered a brand-new category of long-lasting, low-maintenance wood products. Today, Thermory is the global leader in thermal modification with a broad product line of decking, siding and porch flooring products. Thermory is next-level wood — ask us why!
